This document describes the new font selection features of the LATEX Document Preparation System. AąEęIįUųĖėŪūČčŠšŽž It is intended for package writers who want to write font-loading packages similar to |times| or |latexsym|.

This document is only a brief introduction to the new facilities and is intended for package writers who are familiar with TEX fonts and LATEX packages. It is *neither* a user-guide *nor* a reference manual for fonts in LATEX 2$_\varepsilon$.
